

CARRIER SOLUTIONS

TELECOM PROVISIONING

In today's service-driven economy, many businesses outrun the competition by implementing the very latest IT and telecommunications solutions. However, researching these solutions requires time and expertise, two resources most managers would prefer to deploy elsewhere, on mission-critical projects.

ATS can help you reduce the headaches associated with juggling different carriers for your local and long-distance phone services, audio & video conferencing, Internet access, high-speed data transport, web hosting and co-location needs.

BENEFITS

Our relationships with nearly 25 different telecom carriers enables us to function as a single point of contact to create an efficient and cohesive provisioning strategy for all your telecom services (voice & data) thereby reducing expenses and increasing your productivity.

ATS will help to reduce your costs and enable you to get the most value from your telecom and IT investments, freeing you from the network services-related analysis, coordination, provisioning and management duties that take up your valuable time.

- FREE service / NO fees / NO markups
- Easy process – we place orders & track installation dates

REQUEST FOR PROPOSAL

If you are planning a large upgrade of your telecom services or want to renegotiate your contracts, ATS can handle the entire process from beginning to end.

Our RFP-Preparation-Distribution-Analysis (RFP-PDA) solution leverages our expertise in telecom needs assessment to:

- Function as single point of contact
- Determine your requirements
- Prepare a detailed RFP
- Distribute the RFP to select providers
- Analyze the providers responses and make recommendations based on your needs

Obtaining the best pricing for your telecom services is important, but many other factors should be considered including service level agreements, provisioning intervals, customer service, and accurate billing systems. Given our experience in vendor management, service provisioning, network engineering and bill reconciliation (auditing), we can recommend the most effective solution while maximizing the use of your internal resources.

AUTHORIZED AGENTS

ATS has authorized relationships with many Tier 1/2/3 service providers including:

- Broadwing, Savvis, US LEC, MCI, Sprint
- ACC, Bell South, Qwest, SBC, Verizon
- Level 3, UUNet, Internap, XO
- PaeTec, Megapath, New Edge, Netifice
- NTT/Verio, Birch, TNCI, TTI, and more.
